ZOHO CREATOR REPORTS SUITE

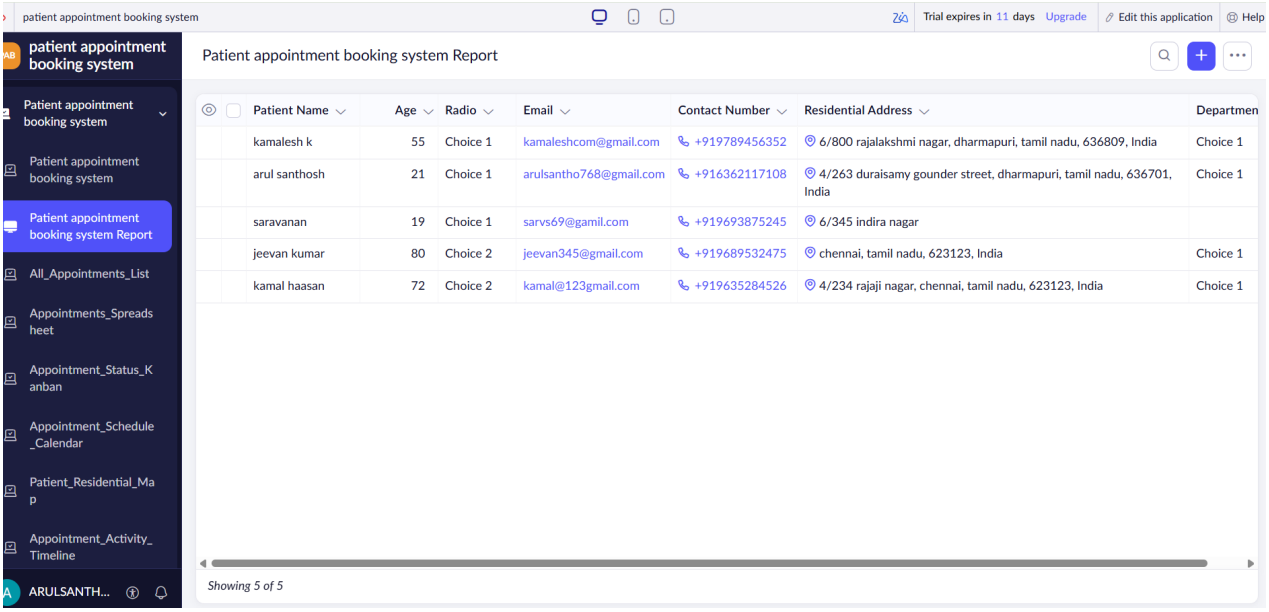

Patient Appointment Booking

Aim:

To design and build a complete suite of Reports in Zoho Creator for the **"Patient Appointment Booking"** application, demonstrating the correct usage and business application of all nine Report Types available in Zoho Creator.

Reports Used Overview

Report Type	Report Name
List View	Patient_Appointments_Report
Spreadsheet View	Appointment_Management_Spreadsheet
Kanban View	Consultation_Status_Kanban
Calendar View	Doctor_Schedule_Calendar
Map View	Patient_Location_Map
Timeline View	Clinic_Slot_Activity_Timeline
Pivot Table	Department_By_ConsultationType_Pivot
Chart View	Department_Distribution_Chart
Summary View	Doctor_Wise_Appointment_Summary

Detailed Report Descriptions

1. Patient_Appointments_Report

List View

- **Purpose:** Default landing report for front-desk receptionists and hospital admin, displaying all booking records in a clean, searchable tabular format.
- **Features:** Includes a global search bar, multi-column sorting, and filters for Patient ID, Patient Name, Contact Number, Attending Doctor, Department, and Booking Date.

2. Appointment_Management_Spreadsheet

Spreadsheet View

- **Purpose:** Utilized daily by clinic staff to rapidly update appointment parameters, vital signs, and intake notes in an Excel-like grid layout.
- **Features:** Enables quick inline editing for check-in status, room allocation, and payment confirmation while locking core patient demographics for data integrity.

3. Consultation_Status_Kanban

Kanban View

- **Purpose:** Provides a visual operational pipeline tracking patient flow through consultation stages (e.g., Scheduled, Checked-In, In Consultation, Completed, Cancelled).
- **Features:** Interactive cards can be dragged across stage columns, triggering automated status updates and notifying secondary care units.

4. Doctor_Schedule_Calendar

Calendar View

- **Purpose:** Used by medical staff, specialists, and scheduling teams to view doctor availability, manage slot bookings, and avoid overlaps.
- **Features:** Monthly, weekly, and daily grid views allowing instant drag-and-drop rescheduling and slot allocation visualization.

5. Patient_Location_Map

Map View

- **Purpose:** Deployed by healthcare management to visualize geographical distribution of incoming patients across regions (e.g., Chennai and suburbs).
- **Features:** Geocode-enabled pins highlighting high-density patient zones to assist in outreach programs and ambulance deployment planning.

6. Clinic_Slot_Activity_Timeline

Timeline View

- **Purpose:** Enables clinic operations to track appointment density and peak consultation hours across different days of the week.
- **Features:** Chronological hourly timeline showing doctor availability gaps and peak patient check-in times.

7. Department_By_ConsultationType_Pivot

Pivot Table

- **Purpose:** Cross-analyzes appointment volumes between clinical departments (Cardiology, Orthopedics, Pediatrics) and consultation types (In-Person, Telehealth).
- **Features:** Matrix aggregation providing row/column totals and percentage metrics for hospital capacity planning.

8. Department_Distribution_Chart

Chart View

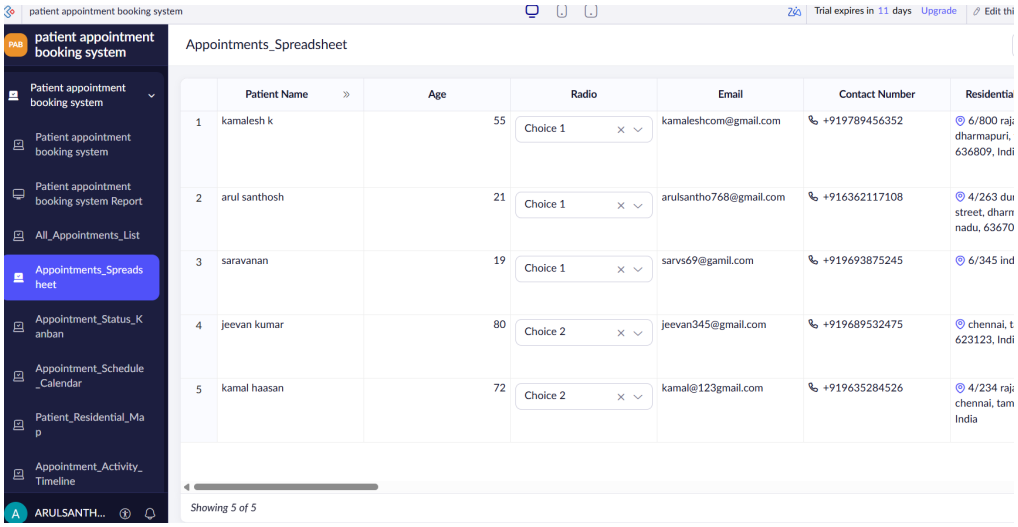

- **Purpose:** Visually compares appointment volume distributions across medical specialties and patient age demographics.
- **Features:** Dynamic pie/bar graphical nodes with interactive legends and filter controls for swift executive review.

9. Doctor_Wise_Appointment_Summary

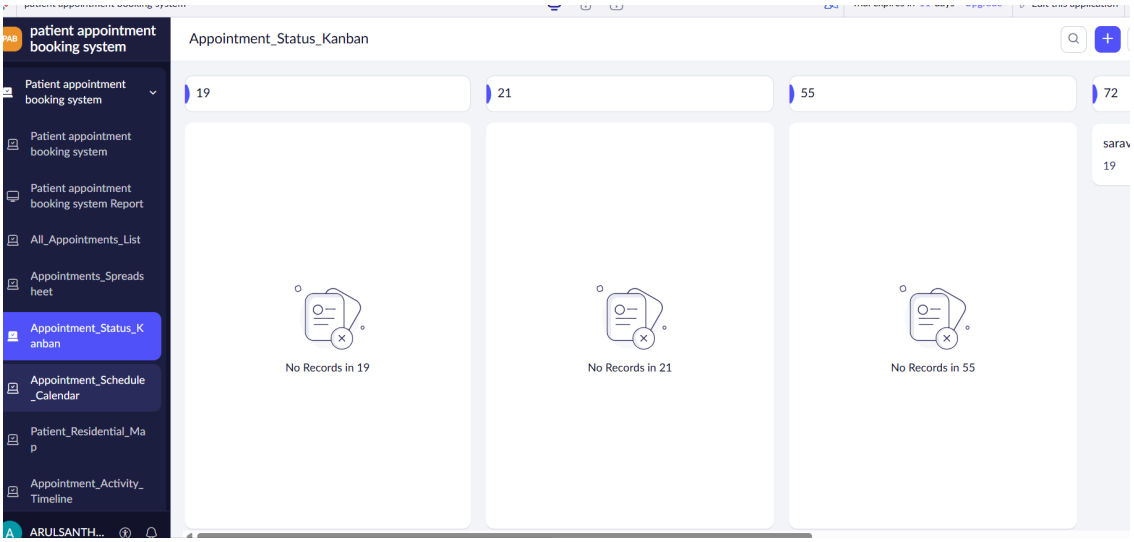

Summary View

- **Purpose:** Aggregates key clinical engagement metrics, doctor workload, and total consultation counts for hospital administration.
- **Features:** Groups bookings by practitioner, showing completed visits, revenue generated, and follow-up metrics.
